Effective Communications Critical to Controlling Disease Outbreaks

At the height of the Zika outbreak in Latin America and the Caribbean, one of the biggest issues public health officials grappled with was how to inform the public, especially pregnant women and women of childbearing age, about the risks of the disease.
Pakistan Takes First Major Step to Eliminate Trachoma

In a remote village high up in the Northern Pakistan mountains that has seen its share of strife and hardship, men, women, and children gathered last month to take a drug that could save their sight. Read more.

North Korean Defector Sheds Light on Parasitic Worms

News reports swirled before Thanksgiving that a North Korean defector had 10-inch long parasitic worms (Ascaris lumbricoides) removed from his stomach after fleeing to the south. Read more.

Blog: Developing Countries Need Access to Essential Medicines for Noncommunicable Diseases

Companies who want to do more for global health face a dilemma: how to improve access to essential medicines while keeping shareholders happy. Read more.
