## Progress Report

Our ability to catalyze collective action helped make another breakthrough year for The Task Force. We helped the world reach the 'last mile' of polio eradication. We supported treatment for hundreds of millions of people for neglected tropical diseases. And we made progress in brokering a new way for U.S. public health to know about disease outbreaks. Our progress report showcases some of this work and how we're doing it.

## The Invisible Elements that Drive the Engine of Disease Elimination

On a cool October day in a village high up in the mountainous reaches of northern Pakistan, men, women, and children gathered to take a drug that can save their sight. [More](#)

## Bridging the Digital Divide

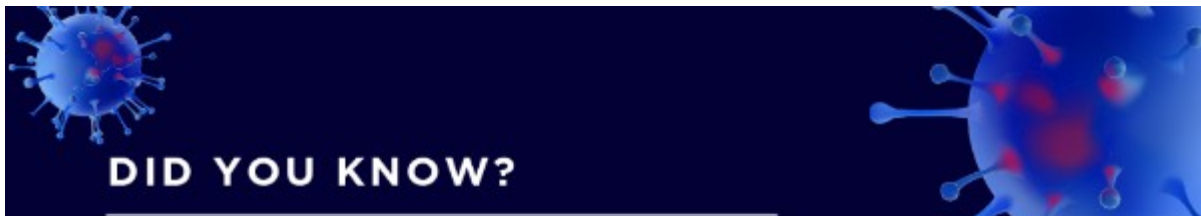

Part policy think tank, part start-up incubator, Digital Bridge is a working collaborative among U.S. public health as well as the healthcare and health information technology (IT) sectors.

## Interactive Map: Highlights of Our Work

Last year, we contributed to the elimination of a disfiguring neglected tropical disease in Togo and sparked a new initiative to improve coordination among trachoma elimination programs in East Africa. Our map provides a look at highlights from our work over the last year. [More](#)

An infographic with a dark blue background. At the top, the number '80,000' is written in large, white, sans-serif font. Below it, the text 'PEOPLE DIED OF THE FLU IN THE U.S. LAST YEAR' is written in a smaller, white, sans-serif font. To the right of the text are two stylized, blue, spiky virus particles. At the bottom left, there is a white Twitter bird icon followed by the text 'TWEET THIS' in white, all enclosed in a white rounded rectangle.

**80,000**
